## FI-E38 (R)

### High End Performance Schuko Power Connector

-Reviews-

## RATING

## FEATURES

### Furutech Pure Transmission Philosophy

Meticulous build quality is a large part of the engineering equation. Furutech Pure Transmission technology turns a macro lens on every element of power and signal transfer applying optimized engineering solutions to well-known problems such as contact resistance, EMI and RFI rejection, grounding, and using the best materials and processes available.

Featuring new specially engineered pressure plate and metal cable clamp

## SPECIFICATIONS

- $\alpha$  (Alpha) pure-copper rhodium-plated conductors
- Floating Field Damper System\*
- Nylon/fiberglass body incorporating carbon particles that absorb vibration and resonance
- Specified for cable diameters from 6mm to 17.0mm
- Dimensions: Body length 56.6mm x 39.6mm diameter x 88.7mm overall length
- Metal cable clamp improves grip and reduces mechanically and electrically induced distortion
- Rating: 16A/250V AC

\* We've renamed the patented Earth/Ground Jumper System to better describe the circuit's engineering and effects. US Patent No. 6,669,491
