

FI-E30 NCF High End Performance NCF Schuko Socket

RATING

Type: 2-pole +earth; Rating: 16A 250V A.C.

FEATURES

Nano Crystal[®] Formula - Nano Crystalline, Ceramic and Carbon Powder
Incorporated into select Furutech products, Nano Crystal[®] Formula --- NCF is comprised of a special crystalline material that has two "active" properties. First, it generates negative ions that eliminate static and secondly, it converts thermal energy into far-infrared. Furutech then combines this remarkable crystalline material with nano-sized ceramic particles and carbon powder for their additional "Piezo Effect" damping properties. The resulting Nano Crystal[®] Formula is the ultimate electrical and mechanical damping material — only found in Furutech products!

SPECIFICATIONS

Main conductors: α (Alpha) Pure copper Rhodium plated

Dimensions: 50.6mm \times 50.6mm \times 36.0mm (L \times W \times H)

Insulation Materials: Nylon/fiberglass incorporating special "NCF" anti-resonance damping material - nano-sized crystalline, piezo ceramic particles and carbon powder
